CONTEXT SLIDE 1

For the purpose of this debate, digital sovereignty refers to the ability of a State to control or regulate their digital environment. This extends to data, the internet, and other digital networks under which jurisdiction it falls. (I.e. India's Ban on TikTok, China's Internet Censorship, EU's Rules on International Data Transfers, etc.)

CONTEXT SLIDE 2

no first use' policy refers to a policy wherein a state pledges to not preemptively use a weapon first unless as retaliation against another state who used the same weapon against them.

Cyberweapons are commonly defined as malware agents employed for military, paramilitary, or intelligence objectives, examples include computer viruses or propaganda.
